

This idea comes from the current situation we are going through due to Covid - 19.

We have realized this stainless steel column made in AISI 304, Scotch Brite finish. It is completely free-standing, without the need of any attachment to the ground or wall. You can easily place it where it would be useful to have a sanitizing station with hand sanitizer dispenser and disposable gloves.

Additionally, on the upper side of the column you can position the regulations for the proper hand washing according to the Ministry of Public Health.

On request, it is also possible to customize it with your company logo.

It can be placed and moved in all those spaces where wall fixing is not allowed.

Thanks to its compact size and its appealing design, this sanitizing station is very useful at the entrances of public places, shops, offices, companies, etc.

Moreover, it is made of a hygienic material that is easy to clean and sanitize.

TECHNICAL FEATURES	
Height from the ground (mm)	1506
Dimensions' base (mm)	400x350x6
Diameter's hand sanitizer dispenser	Ø 85
Dimensions' disposable gloves dispenser	240x120x80
Net weight	18 kg
Gross weight	22 kg
Package	Box

It is supplied ready-built, in a recyclable box. Prices upon request.
